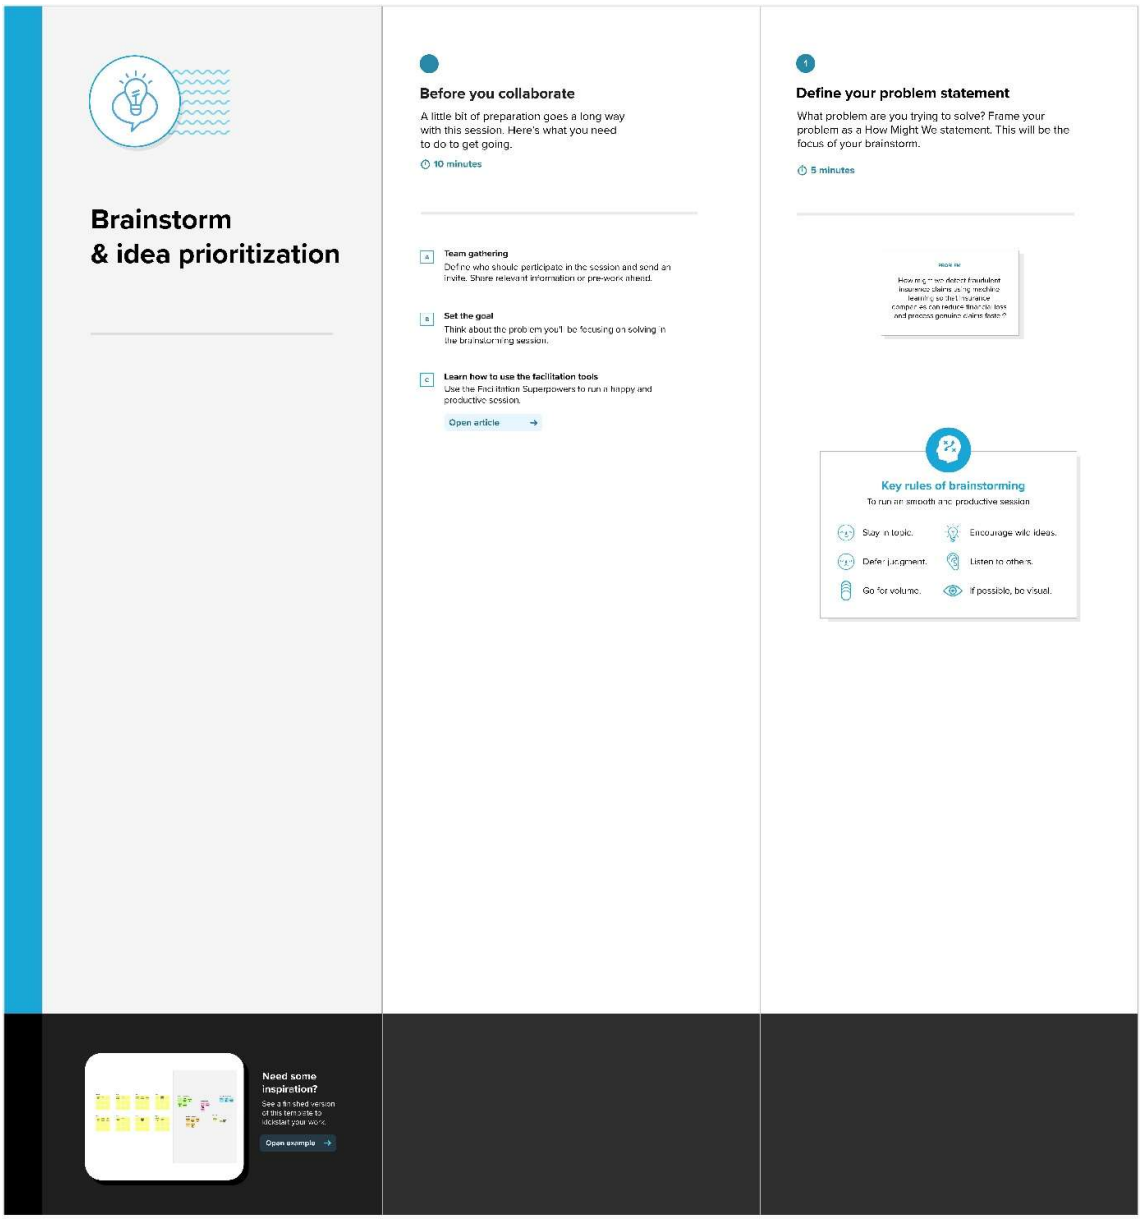
Ideation Phase
Brainstorm & Idea Prioritization Template

Date	26 February 2026
Team ID	699d5f83fdf409fdbd1bec82
Project Name	InsureGuard — AI Insurance Fraud Detection System
Maximum Marks	4 Marks



2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Person 1

Analyze **insurance claim data** using machine learning to predict fraud.

Person 2

Use **Random Forest / Decision Tree algorithms** to classify claims as fraud or genuine.

Person 3

Detect fraud by analyzing **customer history, claim amount, and accident details**.

Person 4

Create a **web-based dashboard** that shows fraud prediction results and statistics.

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP

Add customize-de tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as clusters within your mind.

Cluster 1 – Machine Learning

- Random Forest
- Decision Tree
- Fraud prediction model

Cluster 2 – Data Analysis

- Claim amount analysis
- Customer history
- Claim frequency

Cluster 3 – System Interface

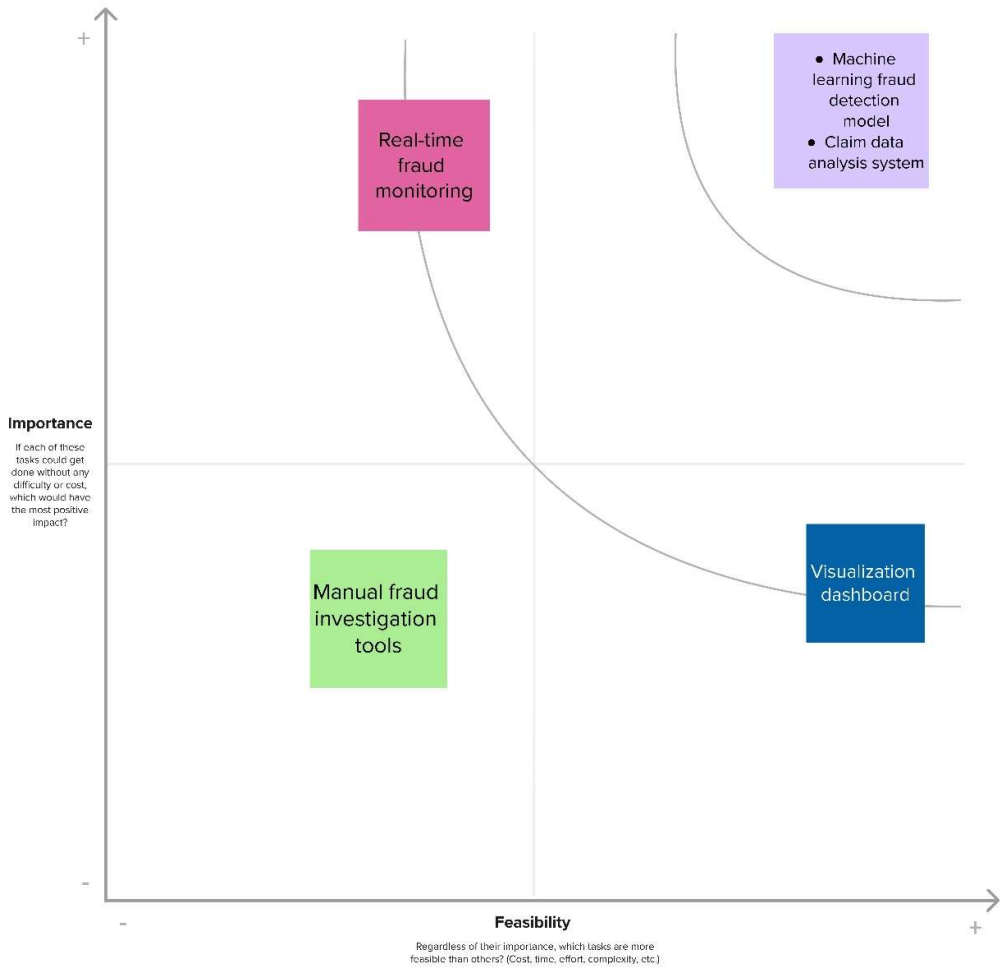
- Web dashboard
- Result visualization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP


Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.
